Over 65 years of experience

The industrial complex, developed on 4 levels, minimizes land consumption, leaving most of the surface undeveloped.

99%

The conscious use of raw materials minimizes waste, utilizing up to 99% of the purchased material.

500 KW

A photovoltaic system installed on 70% of the industrial complex's surface, producing approximately 500 KW, was installed in 2020 and has further been implemented in the next years.

GIUSSANO, ITALY, SINCE 1957

Founded in 1957, Elli is a family-run company focused on the future while remaining committed to preserving local traditions. Elli places the quality of life of each of its stakeholders at the center, with various initiatives aimed at giving back more to the community than it takes, in a genuine and long-term give-back approach.

The headquarters in Giussano is a virtuous example in many aspects. The industrial complex, developed over 4 levels, minimizes land consumption, leaving most of the surface undeveloped. The result is an efficient and well-integrated operation within the city context.

Elli's most significant contributions to the community of Giussano and surrounding towns often occur through sponsorships to non-profit organizations such as:

- Organizations promoting art
- Organizations promoting the local territory
- Sports clubs
- Caritas Italiana
- Kindergartens, schools, and parishes
- Nursing homes
- Croce Bianca Italiana (Italian White Cross)

ENERGY

In 2020, Elli launched Green Passion: a program to raise awareness about the company's commitment to our planet.

Elli has always favored a conscious use of raw materials that minimizes waste, utilizing up to 99% of the purchased material. In fact, even the sawdust and wood chips from the processing of solid wood are collected with a modern suction system, stored, and transformed into biomass, used for producing hot water for specific production processes such as pressing and drying.

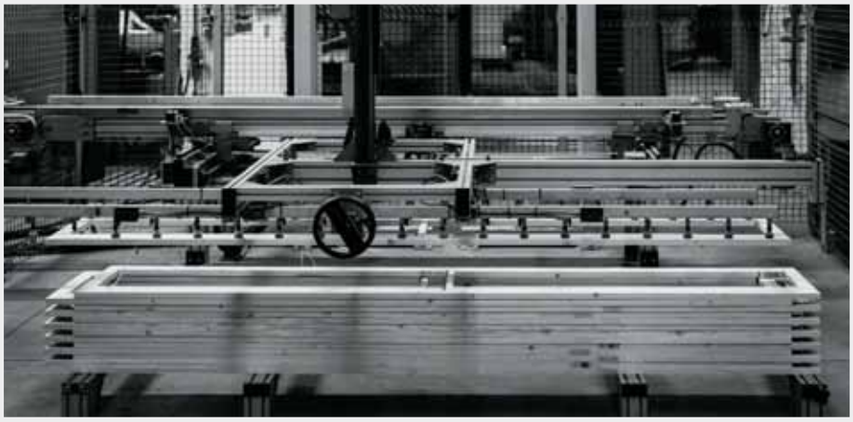

With recent expansions to the industrial complex, Elli invested heavily in renewable energy, installing high-efficiency photovoltaic panels on more than 70% of the roof surfaces, generating 500KW of solar energy to support the production process.

Uncompromising quality

Longer lifespan.
The high-quality hardware works with solid wood

Weight is 40% lighter than most panels on the market.
Packaging and transportation produce fewer emissions.

Top-quality materials.
The supporting frame is made of solid Alpine Spruce (Picea abies) from the Magnifica Comunità di Fiemme (Trento, Italy).

Veneered with real wood panels.
Veneers of local species from controlled cultivations are preferred, particularly Fraxinus excelsior, common in Europe, and Quercus petraea.

TAMBURATO WOOD

Elli's furniture has always been designed and made without compromise in terms of quality. The highlight of the collection is the iconic modular systems, built with honeycomb wood panels featuring a solid wood frame. They are produced by skilled workers directly at the headquarters in Brianza. The material used is Red Spruce from the Magnifica Comunità di Fiemme, a key player in managing the vast forest heritage of the valley, which is crucial for a fair exploitation of natural resources and preserving the historical, social, and cultural identity of the region. Red Spruce from Val di Fiemme is a unique material with high elasticity and low specific weight. Its absolute regularity and stability led renowned luthiers, such as Antonio Stradivari, to choose it for creating their instruments with an unmatched sound. The craftmanship art is the precious heritage Elli preserves and passes down through conscious innovation.

THE VALUE CHAIN

Suppliers based in Lombardy

Suppliers based in the province of Monza and Brianza and neighboring provinces

OTHER MATERIALS

Other wood materials: multi-particle panels

GARANTITO PANNELLO ECOLOGICO 100% LEGNO RICICLATO

More than half of the materic finishes are supported by 100% recycled panels

The remaining portion is made from virgin European wood, mostly Poplar, known for its lightness and strength, with rapid growth (7-10 year life cycle)

Aluminum and glass

The life cycle of aluminum is infinite with proper waste sorting and recovery systems

Packaging is mostly made from 100% recyclable paper material

Digital order management has significantly reduced paper usage, saving around 300,000 sheets per year

Colors and paints

MADE IN ITALY

From Italian manufacturers

One of the first to use eco-friendly water-based paints since 2014

Hardware

The steel used in 90% of the hardware is 100% recyclable, with a lifespan exceeding 50 years

MADE IN ITALY

Italian-made hinges tested for over 120,000 opening cycles

MADE IN AUSTRIA

Austrian-made runners tested for over 100,000 opening cycles

Lighting

EN 62471:2008

LED lights from an Italian company compliant with EN 62471:2008 regulations

92% of LED production waste is recycled

3cadlite

With 3CadLite, it is possible to draw any environment with all the elegance of Elli products.

The flexibility of the new plants supports human experience, allowing easy product customization for each client.

3CADLITE CONFIGURATOR

3CadLite is the web solution that allows dealers to always be up to date with the company in a simple and effective way, enhancing the sales experience. Elli distributes its online catalog to its worldwide network of dealers, providing them with a powerful, easy-to-use, and attractive sales tool. With 3CadLite, it is possible to configure every environment with the flexibility of Elli products, responding in real-time to customer needs. The configurator allows the presentation of the project to the final customer easily and effectively through prints showing the public price, as well as render images, even in panoramic mode. With projects received through the graphical configurator, Elli's technical departments can check and correct quotes and orders, drastically reducing execution times.

INTERCONNECTED PRODUCTION

Elli's approach to production innovation translates into targeted investments aimed at increasing manufacturing flexibility. New spaces have been created to house automated and interconnected machinery, integrated with the design system via the 3CadLite configurator. Data is transmitted directly to the production line, enabling agile and customized order management. The new facilities support human expertise, allowing each product to be tailored to the customer's specific needs. The factory is efficiently powered thanks to on-site photovoltaic systems, reducing waste and energy costs. These investments also enable the integration of innovative materials that enhance the classic finishes representing the timeless style of the Elli collection.

The ErgoAir slatted beds are designed to provide the best dynamic support to the spine, properly distributing the body weight and ensuring the right balance between movement elasticity and support stiffness. In addition to ensuring high quality and best functionality for long-lasting use, the robust ErgoAir slats feature special flexible orthopedic slats made of multilayered beech wood. The shock-absorbing joints include silent, self-lubricating nylon supports; the slats guarantee progressive lowering elasticity. The slat size, functionality, and spacing ensure healthy and hygienic mattress ventilation. The perimeter is made of thick metal (up to 1.5 mm thick when folded) and has an epoxy finish to reduce magnetic fields. Manual or electric adjustments are possible (not compatible with storage box beds). Some bed models feature disassembled slats for easier transportation. Available in double, queen, single sizes, 10 cm shorter, or custom-made.

FIX ORTHOPAEDIC SLATS
Orthopaedic base with flexible slats. It comes preassembled with the storage box or not pre-assembled upon request.

ORTHOPAEDIC SLATS WITH MANUAL MOVEMENT
Orthopaedic base with flexible slats featuring two movements (head and feet). The two movements have manual adjustment. Mattress Memo is recommended.

ORTHOPAEDIC SLATS WITH MOTORIZED MOVEMENT
Orthopaedic base with flexible slats featuring three movements.

ANATOMICO

Bonnell spring mattress

H. cm 20

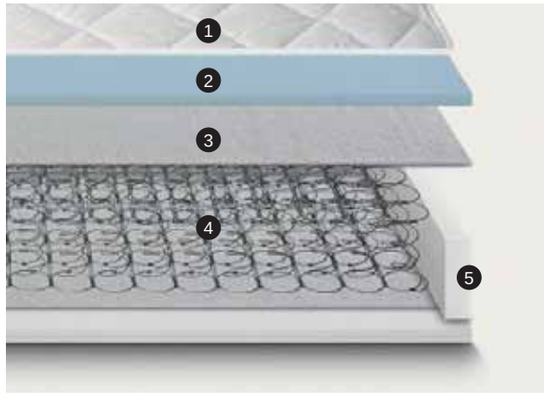

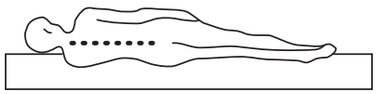

The traditional Bonnell spring mattress features a system of interconnected springs, providing a surface of uniform support. Practical and durable, this model results from a boxed steel spring system on all four sides, making it resistant and durable over time. It is recommended for those who prefer a very firm surface.

BOX SPRING MATTRESS

1. Non-removable cover
2. Superior layer in memory thickness cm 2
3. Felt layer
4. Spring box structure 200 springs in single, 400 springs in queen
5. Perimeter in expanded polyurethane

MEMO

4-layer memory foam mattress with differentiated zones

H. cm 24

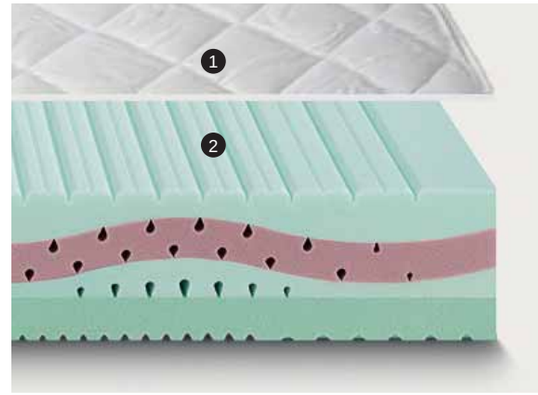

The main feature of the memory foam mattress is the enveloping sensation during rest. The “memory” of the viscoelastic material ensures perfect adaptability to the shape of the body and the sleeping style of each person.

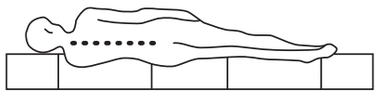

The four-layer structure with differentiated zones makes this mattress ideal for those seeking particular ergonomic and supportive comfort. It is the perfect blend of natural materials and technical fabrics for unparalleled relaxation.

INDIPENDENTE

Pocket spring mattress

H. cm 24

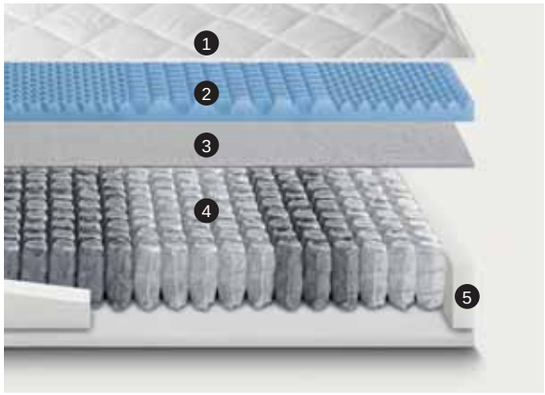

The independent spring technology combines innovation and tradition, offering ample freedom of movement and comfort. The internal structure absorbs oscillations caused by people's movements without transferring them to the other side of the mattress, allowing for uninterrupted rest throughout the night. 800 individually pocketed steel springs create a 7-zone differentiated, anatomical, and self-modeling structure with a remarkable capacity to adapt to any body type. The high-density, micro-perforated perimeter box system ensures optimal breathability, while the memory foam surface provides a decompressive effect. Materiality and softness, strength and delicacy; these opposites describe the qualities of this model, where comfort and product quality converge, designed to last over time.

BRERA

Storage units

Brera is a system featuring two different openings: either with Push & Pull mechanism or with a vertical handle. The external cover frame is cm 1,2 thick. This system enjoys a wide variety of compositional creativity thanks to open units, showcases, drawers and hinged or flap doors. The drawers can be customized with tecnoleather bottom and internal storage unit. Antishock decelerated drawer units, self-installing system with quick release, height adjustment. Brera system enjoys wide dimensional variety thanks to its several modules.

CLIMB

Storage units

Climb is a system of storage units featuring opening with Push & Pull. The special 45-degrees building technique means that Climb products do not need any top panel, which can still be added upon request and has thickness of cm 2. The system allows significant design creativity, thanks to its wide variety of solutions such as open units, showcases, drawers and hinged or flap doors. The drawers can be customized with handles, tecnoleather bottom and an internal storage unit. Antishock decelerated drawer units, self-installing system with quick release, height adjustment. The Climb system enjoys wide dimensional variety thanks to its several modules.

VENARIA

Storage units

Venaria night containers are part of a comprehensive system where materials and refined finishes give a relaxed and understated design. The straight lines of the carcass harmoniously mix with the gentle corners that are smoothed and rounded. A thin top kindly hovers above the carcass without touching it. Venaria family perfectly fits elegant and modern spaces where the detail really makes the difference. Available in wood essence or lacquered.

MURPHY BEDS

Murphy furniture represents a concrete response to the growing need for flexible living spaces. Unlike traditional furnishings, these solutions offer fluid design possibilities, capable of adapting to multiple configurations and different moments of use. The user becomes an active protagonist in shaping the space, which changes according to their daily needs. Temporal versatility is another key strength: multifunctional furniture and modular systems allow for the reconfiguration of spaces and functions, keeping pace with evolving lifestyles and family structures. In this context, transformable furniture is a smart tool for optimizing space and enhancing every square meter. The interaction between people and their environment becomes central: design responds to gestures, anticipates needs, and multiplies functions. It creates a tailor-made habitat that reflects the identity of its inhabitants, offering design freedom and a new vision of the domestic space as a dynamic, ever-evolving organism.

SIDE PANEL
Panel in honeycomb wood or wood-based agglomerate, 3 cm thickness. Internally with finish of the carcass; externally either with finish of the carcass or lacquered. It comes with vertical micro-holes for the movable shelves. It can be equipped with vertical LED lighting.

TOP
Panel in honeycomb wood or wood-based agglomerate, 3 cm thickness. With finish of the carcass. It can be equipped with horizontal LED lighting.

ALUMINIUM SIDE PANEL
Aluminum profile, 3 cm thickness, in Metal Grey finish. External side can be equipped with 0,4 cm thick glass. For each shelf, an aluminum crossbar in Metal Grey must be added.

FINISHING SIDE
Wood-based agglomerate panel, 2 cm thickness. In wood essence or matte lacquered finish.

SHELF
Panel in honeycomb wood or wood-based agglomerate, 3 cm thickness. With finish of the carcass, it can be equipped with horizontal LED lighting.

BACK PANEL
Wood-based agglomerate panel, 1 cm thickness.
With finish of the carcass.
The back panel goes in the milling of the base, cap and sides.

GLASS BACK PANEL
Glass back panel, 0,5 cm thickness.
Mounted with a gasket, in the milling of the base, cap, and side.

ALUMINIUM SHELF
Aluminum profile, 3 cm thickness, in Metal Grey finish. Shelf in smoked glass or MDF panel covered with techno-leather.

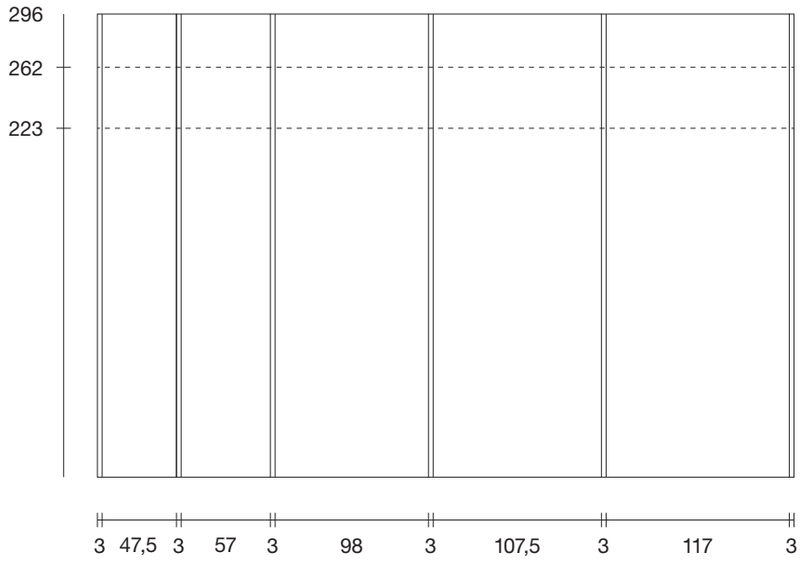

DOOR
See the “door types” section on page 98.
In double-door modules, the left door always has a dustproof stop.
The doors are supplied with soft-close hinges with triple adjustment

BASE
Panel in honeycomb wood or wood-based agglomerate, 3 cm thickness.
With finish of the carcass
Equipped with a 3 cm plinth, a level adjuster and a 3 cm high base.

Bridge closets with boiserie

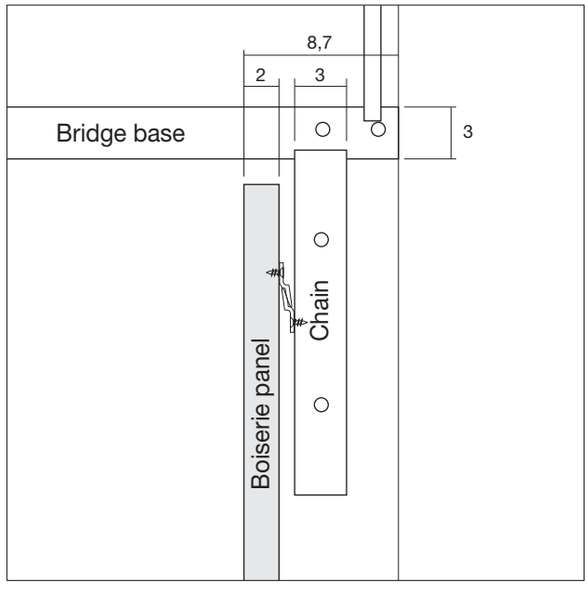

BOISERIE BRIDGE
The boiserie bridge units are designed using
module widths of 98 / 117 / 148.5 / 180 / 199 / 237 / 249.5 / 297 cm.
They are always equipped with removable panels with a thickness of 2 cm.
The boiserie panels are hooked and they are slightly
shorter in height than the space below.
There is always a 0.4 cm vertical gap between the boiserie panels.

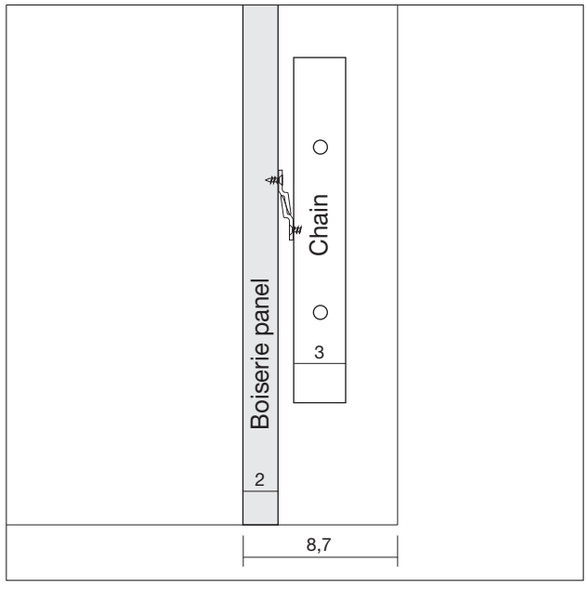

BOISERIE BRIDGE

BOISERIE BRIDGE CHAINS

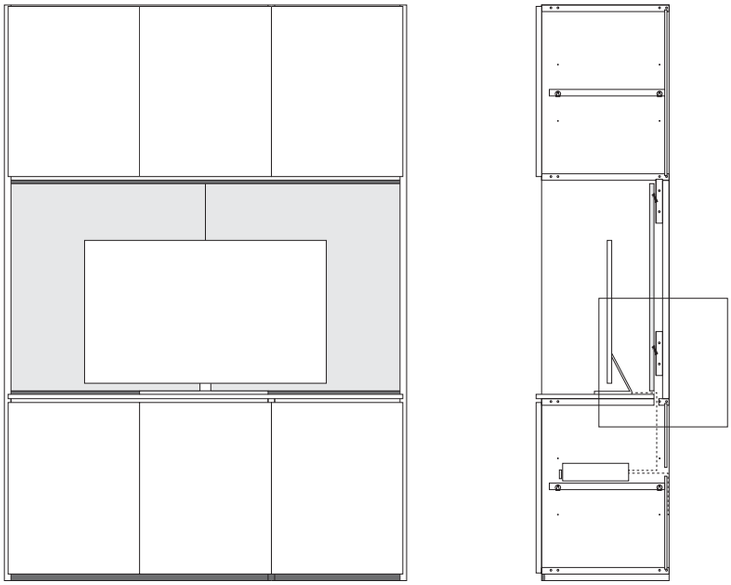

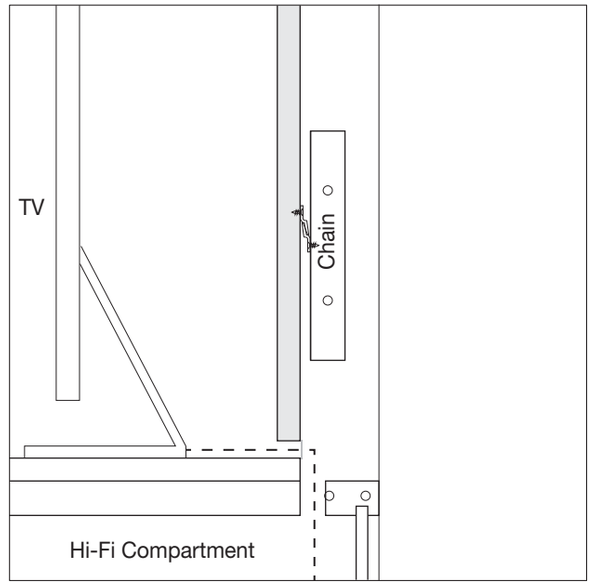

TV Compartment Examples

The boiserie bridge units are designed using module widths of 117 / 148.5 / 180 / 199 / 237 / 249.5 / 297 cm. They are always equipped with removable panels on which a TV can be mounted. The boiserie panels are slightly shorter in height than the compartment, to allow for hooking and cable routing (see detail A). The boiserie panels are hooked onto the front side. The cable outlet hole is available at an additional cost if a TV is mounted. Hi-Fi compartments can be connected through a cable outlet hole positioned behind the TV back panel.

Inspections

INSPECTION ON THE SIDE PANEL with removable panel.
Removable panel
10mm thickness, carcass finish.

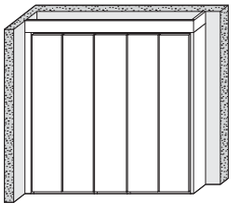

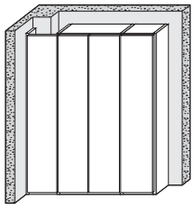

INSPECTION HATCH
Hatch with aluminium frame with metal grey finish.
Not available with custom dimensions. It can be used to do an inspection or built-in in the cap when there is not enough space above the cap.

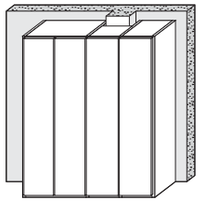

Systems programme

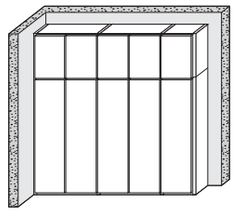

Fillers:
Vertical or horizontal.
Flush to door or flush to carcass.

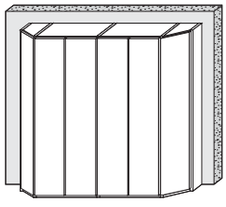

Spacing door
with end panel.

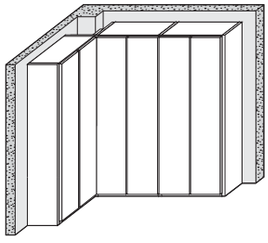

Overcoming pillars
with depth change
60.5 cm - 41.3 cm.

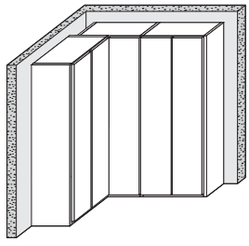

Height extensions (81.5 cm
131 cm) and custom-made
for heights above 296 cm.

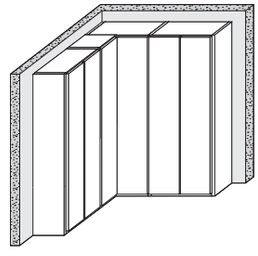

Use of terminal
elements 45° - 30°.

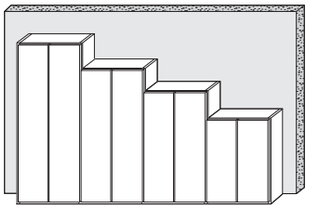

Non-usable corner:
Filler between two wardrobes.

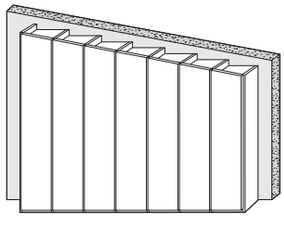

Usable corner: Two wardrobes
placed side by side.

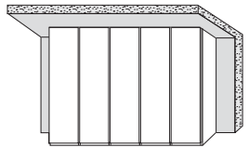

A corner module:
a whole wardrobe.

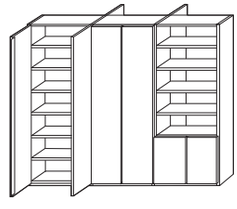

Solutions in various
heights with step carcass.

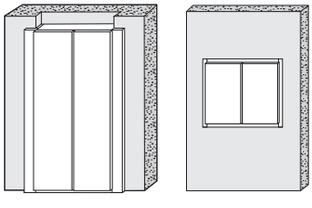

Sloping closet with
trapezoidal doors (step carcass).

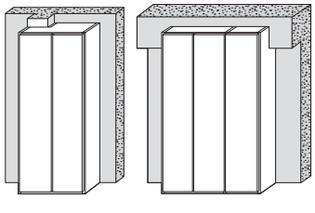

Sloping closet with doors
that go above the carcass.

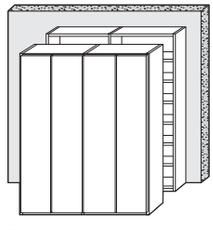

Double-sided: Wardrobes
or bookcases accessible
from both sides.

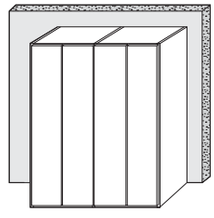

Storage door with
end panel or frame
with flanges.

Column or beam
offset with side
and base recess.

Extra depth of carcass with veneer
and lacquer: consider standard day
module plus another module with
no back panel and custom depth.

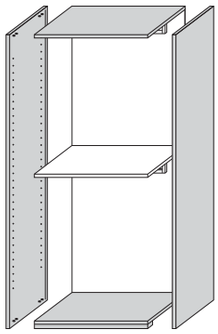

Extra depth of carcass
with materic finishes.
Max depth: cm 80.

Materic

A door that translates the solidity of the melamine faced particle board into a velvety, modern visual experience. It represents the perfect synthesis of accessibility and sophistication: three textured color variants dress the wardrobe system with a sober language, leaving the task of defining its final identity to the choice of handle.

Materic

A door that explores the depth of the mark: the particle board evolves into a woven surface, blending the visual softness of the texture with the proverbial durability of melamine. Available in three distinct three-dimensional finishes, this proposal enriches the wardrobe system with a tactile and sophisticated aesthetic, ready to embrace any handle from the collection as a bespoke sartorial detail.

Door ITACA

Hinged door

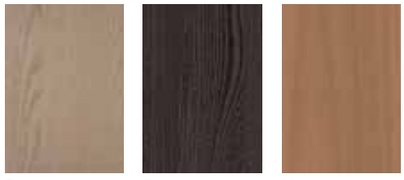

Wood veneer or lacquer

A door representing the pinnacle of construction mastery. The honeycomb core is enclosed within a solid spruce wood perimeter frame: an invisible architecture that ensures absolute stability and a timeless lightness. Clad in precious wood veneers or available in lacquered variants, this proposal is a tribute to durability. A timeless classic that transforms the wardrobe into a piece of high craftsmanship, fully customisable with the collection's handles.

Door IDRA

Hinged door

Wood veneer or lacquer

The most historic model in the collection is a tribute to fine cabinet making: a honeycomb core door with a solid spruce frame. Its unmistakable feature is the handle groove carved directly into the wood, a detail of subtraction that reveals the internal structure and enhances its tactile depth. This design element allows the internal wood essence to remain visible, creating a unique interplay of volumes and contrasts. An iconic piece, available in wood or lacquer, dedicated to those seeking the authentic beauty of materials built to last.

Door MYKONOS

Hinged door

Upholstered with fabric or technoleather

The elegance of the wardrobe system reaches its peak in this door, which blends the structural nobility of the honeycomb core with the sensory softness of refined fabrics and technoleathers. A slender aluminum profile frames the perimeter, transforming the surface into a textile element of geometric rigor. A sophisticated balance between artisanal warmth and technical precision, reaching its aesthetic fulfillment through the choice of handles from the collection.

Door PARO GLASS

Hinged door

Frame in aluminium and glass

The pinnacle of technological innovation manifests in a door where engineering disappears into design. Characterized by a pure aesthetic, it integrates a full-height handle into the profile and recessed concealed hinges within the side panels, enabling a fluid opening that exceeds 180°. While the veneered honeycomb structure represents the collection's historical memory, this solution embodies its future: a marvel of high-tech mechanics that transforms the wardrobe into a dynamic architectural device, redefining the boundaries between function and absolute beauty.

Wood veneer or lacquer

A sliding door that redefines space through expansive surfaces and impeccable movement. The design is punctuated by full-height aluminum profiles that, beyond ensuring absolute structural stability, serve as integrated handles with a rigorous aesthetic. This solution can be crafted with the nobility of honeycomb core panels, lightweight and non-deformable thanks to the solid wood frame, available in wood veneers or lacquered finishes. Alternatively, the aluminum frame can house glass and mirrors, transforming the wardrobe into an ethereal volume of pure light. A versatile system that merges cabinet making mastery with technical vanguard.

Wood veneer o lacquer

A sliding door defined by extreme formal purity, where the 33 millimeter thickness sets the standard for a new level of solidity. The honeycomb core structure, featuring a solid spruce perimeter frame, ensures impeccable stability combined with surprising lightness. Available in precious wood veneers or lacquered variants, the door can be equipped upon request with coplanar movement, an avant-garde solution that aligns the surfaces into a single, seamless plane. A rigorous aesthetic, ready to be personalized with the collection's exclusive selection of handles.

Delo island

Technical details

DELO ISLAND

The Delo Island is directly derived from the wardrobe system, sharing the same modular structure with 3 cm thick side panels. The system is characterized by the ability to customize the drawer fronts, with an opening via a recessed groove in solid wood or with handles matching the wardrobe doors. The top closure is in smoked glass supported by a painted aluminum frame, with the possibility of LED lighting. A highly flexible modular system, offering a choice between drawers or open compartments available in Elli finishes. The drawers can be customized with handles, fabric bottoms, and internal dividers for accessories. Drawers feature a soft-close anti-shock movement, a self-installing system with quick release, and height adjustment. The freedom in composition and dimensions is guaranteed by the wide range of available modules, which can also be custom-made.

INCLINED SHOE RACK

The inclined shoe shelf allows you to organize footwear efficiently and optimize the space of the system. The inclined shelves are available in 2 different depths (54.7 cm - 35.5 cm) and 5 different lengths to fit and optimize every part of the system. They cannot have custom depth, and the inclined shelves are not compatible with the frame sides. Shoes are displayed like in a shoecase, preventing damage and making them easily accessible. The shelves are available in all carcass finishes and feature aluminum slats embedded in the design. Not available with custom depth or frame sides.

INTERNAL DRAWERS
The drawer unit is available in various widths and heights, depending on the number of drawers desired. This option helps to optimize and personalize the organization of clothes and accessories. The drawer unit can be composed of 2, 4, or 6 drawers, with fronts 18 cm high. Inside the wardrobe, it's possible to have either a floor-standing or a suspended drawer unit with a maximum of two drawers.

The drawers feature the elegant and minimalist SLIM handle in Metal Grey finish, along with a 3 cm thick top. The drawer interiors can be enriched with technocloth containers (e.g., AC939C) with various compartments for watches, jewelry, and more. The drawers come with BLUM partial extension guides as standard; Upon request and with an extra charge, full extension is available only with the standard depth of 58 cm.

VIP TROUSER RACK

The pull out trouser racks with rods are the ideal solution for optimizing wardrobe space and keeping trousers always neat and wrinkle-free. Available in two different widths (98 cm or 117 cm) to meet any need, they have Metal Grey finish, adding elegance and modernity to the furniture. It is possible to customize the trouser rack with a smoked glass front for an added touch of sophistication.

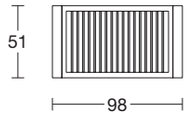

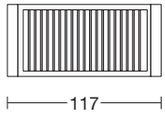

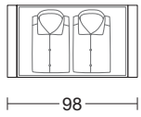

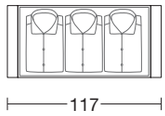

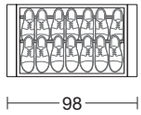

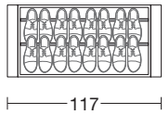

VIP TRAY

The pull out trays offer full extension for easy access to your items. Available in two different widths (98 cm or 117 cm) to suit any need, they have Metal Grey finish, bringing elegance and modernity to the furniture. It is possible to customize the trays with a smoked glass front and choose between a wooden or glass bottom for an added touch of style.

VIP SHOE RACK

Our pull out shoe racks are the ideal solution for organizing your footwear impeccably while adding a touch of style to your wardrobe. Available in two different widths (98 cm or 117 cm) to suit any need, they feature elegant Metal Grey finish that brings modernity and sophistication to your furniture. It is possible to customize the shoe rack with a smoked glass front. Pair the extractable shoe racks with other Metal Grey accessories to create a harmonious look in your wardrobe.

Air sanifier

SALUS 2.0
SALUS 2.0 brings the patented Photocatalytic Oxidation PCO™-PX5 technology from Dust Free® to the world of furniture. This technology was developed in the aerospace sector and is widely used in medical and hospitality environments. The technology is based on the constant flow of air passing through the Dust Free® module, made of a special titanium honeycomb alloy, under the action of a high-intensity UV lamp. The resulting photochemical reaction produces hydrogen peroxide (H_2O_2), which is carried by the airflow inside the wardrobe. This enables the natural sanitizing action to effectively reduce pathogens on clothes and surfaces.

The SALUS 2.0 device is installed in the top of the wardrobe to ensure optimal air circulation through the wardrobe's sanitary space. It is recommended to install a ventilation grid at the bottom of the wardrobe. This way, the sanitized air emitted by the device will prevent mold formation between the wardrobe and the wall.

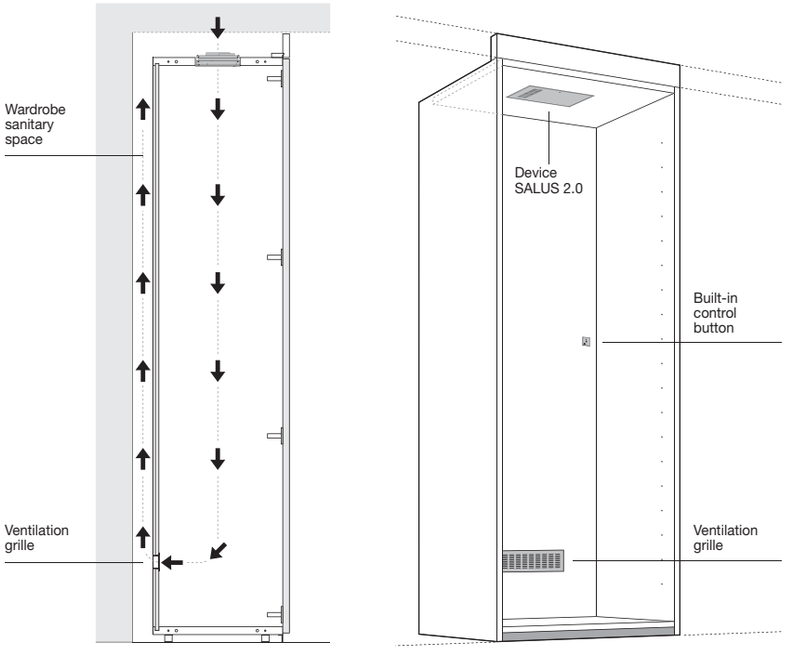

SALUS 2.0 is a high-tech device for air sanitization inside wardrobes and for reducing the viral load of clothing and shoes. Utilizing Dust Free®'s patented PCO™-PX5 technology, also known as Photocatalytic Oxidation, the device continuously releases sanitized air into the wardrobe, allowing for constant sanitization of clothes and surfaces:
- Reduces airborne pathogens
- Eliminates odors
- Eliminates mold, germs, bacteria, and viruses.

Built-in

CONTROL BUTTON

2/4/8 h

Sanitization cycles: 2/4/8 hours long
Day mode:
100% speed
Night mode:
50% speed (silent mode)

The device can perform sanitization cycles of 2/4/8 continuous hours and can operate in two modes:
- Daytime Mode (maximum speed at 100%, LED indicator at 100%)
- Nighttime Mode (silent mode) with reduced fan speed and LED indicator at 50%

DEVICE TURN-ON
Press the button once to turn on the device (wait for the blue LED light to turn on steadily). The brightness of the LED depends on the mode set: 100% in daytime mode, 50% in nighttime mode.

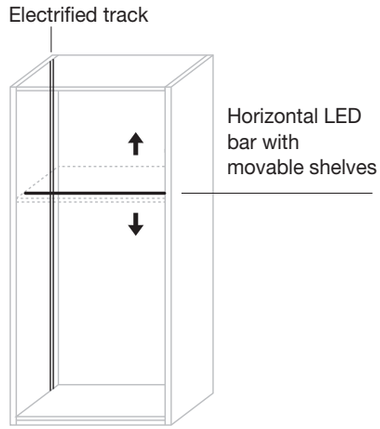

SETTING CYCLE DURATION FOR SANITIZATION
Once the device is on, set the sanitization cycle duration by pressing the button quickly:
1 press: 2-hour cycle >>>2 presses: 4-hour cycle>>>3 presses: 8-hour cycle
The blue LED will blink 1, 2, or 3 times depending on the cycle chosen. Press the button once again to start the selected cycle.

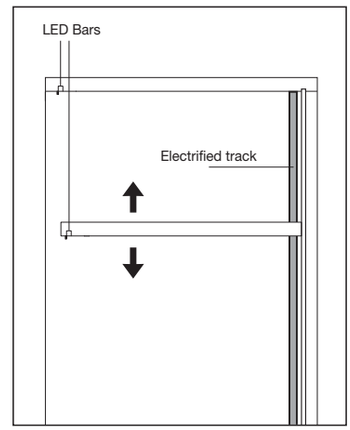

TURN OFF
The device will automatically turn off once the set sanitization cycle is complete. To manually turn off the device, press and hold the button for at least 3 seconds until the LED light turns off.

CHANGE OPERATING MODE
By default, the device is set to operate in Daytime Mode. To switch to Nighttime Mode, hold the button with the device off for 3 seconds and wait for the blue LED to turn on (LED brightness at 50%). The device remembers the last set mode: repeat the procedure to switch back to Daytime Mode (LED brightness at 100%).

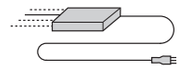

Horizontal

COMPONENTS
- LED bars 3000K, specify how many shelves and the top panel
- LED bar consumption: 8W per linear meter.
- Power supply: 48W.
- Electrified rail positioned on the left side near the back panel.
- Switch on/off system, specify at the time of order.

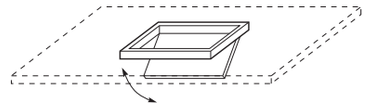

48W DRIVER
Calculate the number of power supplies based on the quantity of LED bars.

HORIZONTAL LED

HORIZONTAL LED LIGHT
The compartments can be equipped with horizontal 3000K LED bars. The lighting bar can be applied to the top panels, wooden shelves, frame shelves, or shoe racks. Using an electrified rail, the shelves can be moved. For LED on the top and fixed shelves, the electrified rail is not required. Horizontal led bars are always as wide as the shelf and can be put on shelves with custom width.
Horizontal and vertical LEDs cannot be used in the same composition. Specify where to put the led when placing the order. **A minimum space of 5 cm above the wardrobe is required for the lighting system. The height can be reduced to 2 cm by using an inspection hatch.**

INSPECTION HATCH
At least one inspection hatch is recommended for every two compartments if the wardrobe is custom-sized in height or installed with upper filler.

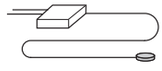

Switch on/off system

Specify at the time of order

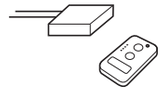

EXTERNAL POWER BUTTON
Connected to the electrical system. Connection made by the customer.
As an alternative to sensor and remote control.

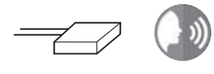

MOVEMENT SENSOR
When recessed into the top panel, the LED lights of the compartment are turned on with the opening of the door.

DIMMABLE REMOTE CONTROL
Alternatively, instead of the motion sensor, you can switch on and dim the LED lights using the dimmable remote control.

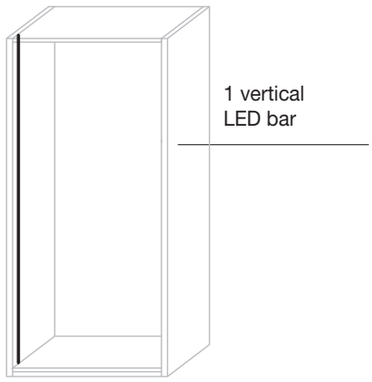

VOICE-CONTROL HUB
Compatible with Amazon Alexa and Google Home. The motion sensor and dimmable remote can be used simultaneously.

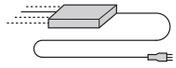

Vertical

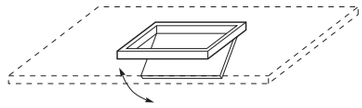

VERTICAL LED LIGHT
The compartments can be equipped with vertical 3000K LED bars. Vertical lighting bars can only be applied to central and side wooden sides, not frame sides. Horizontal and vertical LEDs cannot be used in the same composition. Specify the quantity and position of the desired lighting bars when placing the order.
A minimum space of 5 cm above the wardrobe is required for the lighting system. The height can be reduced to 2 cm by using the inspection hatch.
VERTICAL LED LIGHT NOT COMPATIBLE WITH FRAME SIDE, GHOST HINGE AND PARO GLASS DOOR.

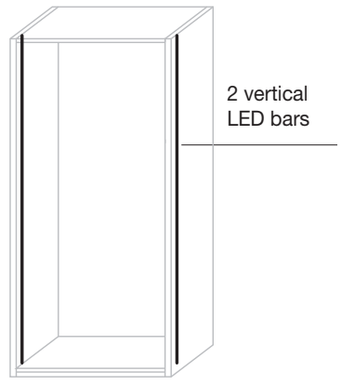

COMPONENTS
- LED bar 3000K, 1 per compartment.
- LED bar consumption: 8W per linear meter.
- Power supply: 48W, calculate the number of power supplies based on the number of LED bars.
- Switch on/off system, specify at the time of order.

48W DRIVER
Calculate the number of power supplies based on the quantity of LED bars.

INSPECTION HATCH
At least one inspection hatch is recommended for every two compartments if the wardrobe is custom-sized in height or installed with upper filler.

COMPONENTS
- LED bar 3000K, 2 per compartment.
- LED bar consumption: 8W per linear meter.
- Power supply: 48W, calculate the number of power supplies based on the number of LED bars.
- Switch on/off system, specify at the time of order.
